

Career objective: Demonstrated ability to quickly learn and apply new skills, contributing to successful project outcomes in a collaborative environment.

EDUCATION

Bachelor's of Computer applications, Manipal University 2025
12th Kendriya Vidyalaya 2022

PERSONAL PROJECTS

- 1, News Application 2024
- Developed a web-based news application using Java for the backend and Bootstrap for the frontend. The application allows users to browse news articles by category and search for specific topics. Integrated with the News API to fetch real-time news data.
 - Technologies Used:
Backend: Java, Spring Boot Frontend: HTML, CSS, Bootstrap API Integration: News API
 - Achievements:
Successfully launched a fully functional news application with positive user feedback. Utilized ChatGPT for frontend development, enhancing user interactions. [Github](#)
- 2, Weather Application 2024
- Developed a Java Spring Boot backend and HTML/CSS frontend weather application. Integrated with a weather API to provide real-time weather data for any city. Implemented features such as displaying temperature, wind speed, and other metrics, with a user-friendly interface allowing city-specific weather searches.
 - Technologies Used:
Backend: Java Frontend: HTML, CSS API Integration: Weather API
 - Achievements:
Successfully launched a weather application providing accurate and real-time weather information. Enhanced user experience with intuitive search functionality and clear weather visualization.
- 3, Quizz App 2024
- Developed a Quiz App using Kotlin and Android Studio to enhance learning and gain internship experience. Utilized Firebase for backend functionality, including user authentication and real-time database management. Despite encountering challenges, such as debugging errors, successfully implemented features like quiz questions, scoring, and result tracking. This project served as a valuable learning experience and demonstrated proficiency in Kotlin and Android development.
 - Key Technologies Used:
Kotlin Android Studio Firebase (Authentication, Real-time Database)
 - Achievement :Created a functional Quiz App, enhancing learning and showcasing technical skills. Overcame challenges in debugging and implementing Firebase integration.

SKILLS

Programming Java, MySql
Framework SpringBoot
Developer Tool Eclips,Vs code
Area Of Interest Java Developer

POSITIONS OF RESPONSIBILITY

- Sports Captain during 12th grade, demonstrating leadership and teamwork skills.
- House Captain, showcasing organizational and interpersonal abilities

CERTIFICATIONS

- Certification in Java and Advanced Java
- Issuer: Coursera
- Completion Date: [2023-2024]
- Description: Completed a comprehensive online course covering fundamental and advanced concepts of Java programming language, including object-oriented programming, data structures, algorithms, and advanced Java features such as multithreading, frameworks etc. [Core java Advance java](#)
